

5 TIPS RE-DESIGN YOUR BEDROOM ON A BUDGET

BY CHIRANIYA CONSULTANCY

INTRODUCTION

A bedroom should be a personal getaway, a sanctuary, which expresses your favorite colors, feelings, and collections. Learn the main rules to remember when renovating your bedroom.

1. Choose Subtle Color

Instead of bold primary colors, choose soothing shades and a restful palette of monochromatic tones. Remember color theory: gentle hues of blue, lavender, or green are considered calm and serene. Rich jewel-toned hues help set the mood of coziness and comfort. These might include toasty browns, deep pomegranate, or topaz. Use toned-down versions of your favorite colors in the bedroom." That might mean choosing mauve instead of eggplant, or pumpkin instead of tangerine.

2. Include Several Lighting

In a bedroom, it's good to "layer" your lighting throughout the room. Ambient lighting lights the whole room, small lamps can focus light for reading and other activities, and accent light helps to wash the walls in soft illumination. To focus reading light where you need it, use a bedside lamp with a movable arm. Each light should be adjustable with a dimmer. Install a separate on/off switch for each light so that you can be selective and light only the area you want.

3. Don't Overlook the Ceiling

The ceiling is the fifth wall in a room. When you lie in bed, do you see a bland, blank surface? Add a subtle pattern or soft color. Paint the ceiling a slightly lighter version of the wall color. This will help to visually lower the ceiling and give the space a feeling of comfort and intimacy.

Other solutions would be to stencil or wallpaper the ceiling, add architectural elements in the form of beams or moldings or use a decorative paint treatment.

For ultimate luxury, Design A Perfect False Ceiling For Your Bedroom.

4. Keep the Bedroom Simple

A bedroom should look cozy and simple, sophisticated, and elegant, regardless of what style of decorating you choose. For ease of movement, leave a minimum of three feet between the bed and side walls or large pieces of furniture and at least two feet between the bed and low furniture, like tables and dressers. If you have to walk around the bed to get from the closet to the bathroom, think of how you can move the bed.

5. Include a Private Nook

Give yourself a special gift with a quiet place to sit and read. Create an intimate reading or lounging area with a comfortable chair and footstool at the end of your bed or in a corner. If you have room, build a window seat under the bedroom window. Enjoy the view and the natural light.

We at Chiraniya Consultancy hope that this information is helpful for any future projects and if you ever need a helping hand or would like to hire one of our technicians, give us a call or contact us at <https://www.chiraniyaconsultancy.com/>
